# #587 [EXHA 006][EXIST] Restroom fan speed controller

## Status

Open

## Type

Planned Work

## List

TAB

## Description

Existing EF-3 does not have a speed switch installed. Unable to accurately balance the system until corrected. Note: MC attempted to install a speed switch but the motor started to hum and get extremely hot very fast. Mc removed speed switch and rewired for low fan speed and system is in design airflow and TAB was completed. Recommend consulting CFA construction manager on next steps. Since system is balanced recommend at least installing a roof disconnect switch.
