We will schedule it for Thursday of next week then. That will give them time to turnover.

My suggestion would be to complete it after turnover, so you won't have to worry about opening. Easier to work around training than opening from what I've heard. Let me know what you decide on!

Thank you!

GC turns over on Tuesday, has a local contactor balancing today? Should we wait until after tuesday and schedule with the store, or wait until opening and do it one morning?
