

Issue List

- EF1 MOTOR SOUNDS BAD
- RTU2-5 LAYING ON CEILING, BACK AREA NOT BEING CONDITIONED
- RTU3 BARISTA FAN NOT SPEEDING UP AND RUNNING OVER FLA

11-10-25 QT #1441 PHOENIX, AZ

Project Issue Information

Issue Name : EF1 MOTOR SOUNDS BAD
Description : EF1 unit is making a very loud noise and barely exhausting. Fan is not moving, sounds like it may be bound up on something. Recommend cleaning and replacing motor. I turned the unit off @ the speed controller - however, it won't stay off.

Project Issue Information

Issue Name : RTU3 BARISTA FAN NOT SPEEDING UP AND RUNNING OVER FLA
Description : RTU3 took about 10 minutes to decel and turn off unit fan, then when I changed speed and checked on it 20 minutes later it seemed to have stopped at 37.7 Hz. Realized it was just increasing by a Hz/min. Running at ~124V and 12.5A. Shut off unit, must not run over 10.6A for that long, also something must be wrong with unit.
