All
See below. This is an EMAIL PO for partial DALT testing in a small area of this job. We already have a pO for tab & Cx. This is a separate po for DALT. I am sure this scope will expand. WE need to prepare for this job on Tuesday for Gabe.

Importance: High

Good morning Joe,

Your PO for leak testing will be **MEC0083768** for this scope. Please use this PO for your site visits for pressure testing and include on your invoice. If we can do 2C next week, that would be great. Thanks again for your help.

Please let me know if you have any questions.

Ok. I think Chris will be ready for part of C. If so, we can do all 3 of these for same price. If not, we will do 2a & 2b.

Joe,

I'm good with that 600 cost below. Please plan to be onsite on Tuesday. We would like to do 2A and 2B. I will send you a PO for this scope... thanks for your help.

Eric
We can perform the DALT (duct testing) either Tuesday or Wednesday of next week. You can pick the day.
The testing as follows:
Duct Leak guidance & testing for Area A, B, & C on 2nd floor Only consisting of (3) main trunklines. National TAB will provide submittals of duct tested, Run the calculations & determine allowable leakage. We will provide all testing materials to perform test & manage the testing. We require Perfection to have the duct samples ready & sealed.
TOTAL will be \$600 if we can do it in ½ a day. If it ends up taking a full day it will be \$1100.

- **It would only take a full day if we are chasing leaks In ducts-Highly recommended that you pretest per note below). Perfection assist getting the machine up to 2nd floor.**

Ideally you would pretest and make sure its ready. I told Chris just to pressure it SLOWLY (I showed him how to do this) & just watch the duct pressure & see if he can get up to 3". I told him he can borrow one of my electronic manometers if he needs it. If he needs it I can have someone drop it off to your office today or tomorrow.

Let me know?

IF this goes well, I can give you a comprehensive pricing for rest of building & we can look at how we can phase it & do more test in one day so its more cost effective. Doing one test at a time is expensive. We try to test a min of 3 duct but doing 6 ducts is best.

Jen

Can you send a formal proposal to Eric. Use the BOLD text above.

Thanks, Eric. I was asking about the air balance. Nick and Joe are working on getting someone out there for DALT.
