I've attached the prints. We are only doing the corner office. Where we'll take out 1 existing supply diffuser and going back with four 150cfm supply diffusers(that are coming off of 2 separate trunk lines.

Can you please get me a quote for this? They're wanting testing and balancing done before we remove existing diffusers and done again after new diffusers are installed? We were already awarded this job, so please let me know when you guys can get this on your schedule.

Thanks,
