Project Summary

The summary below provides a quick understanding of our scope of work and general testing procedures. Enclosed in the report is further detail about your building performance including recommendations, asset data, and pictures. Our focus is to work with the trades to remedy any issues or deficiencies during the actual field balancing and not after the balancing has occurred to achieve a positive environment and outcome. The level of success is determined by the availability of the trades, possible parts needed, or time constraints.

RTU's (Roof Top Units)
Each of the RTU's were measured at their terminal devices or via traverse to establish a total flow for that unit. Each RTU was adjusted to within tolerance of the engineer's design flow. Each outlet was then adjusted to within tolerance of the design flow. Outside air was measured by reading the intake air opening with a velocity grid and multiplying by the free area. The outside air damper was adjusted until the airflow was within the design requirements. Any equipment that fell outside of that tolerance is noted throughout the report.

Kitchen Exhaust Hood & Associated Fans
Each kitchen exhaust fan was measured at the hood filter bay utilizing a velocity matrix and a manufacturer's correction factor. Each filter velocity is multiplied by the manufacturer's corrected area. The sum of these readings equals the total flow of the exhaust fans. The total flow of the exhaust was then adjusted to within tolerance of the design flow.

General Exhaust Fans
The general exhaust fans were measured by reading each air device with a flow hood. The total airflow for each fan is equivalent to the sum of these readings. Fan speed was then adjusted so that the airflow was within tolerance of design. Each terminal device was balanced to within tolerance of the design volume using the installed volume dampers. Any equipment that fell outside of this tolerance is noted throughout the report.

Final Building Tests
After completing the test and balance the final building pressure was measured. It was confirmed that the building pressure fell within acceptable tolerances of -0.02" wc to +0.02" wc and that the pressure measurement coincides with the actual and design net airflow. Any deviations from these standards are noted throughout the report.
The hood capture was tested at the perimeter of the hood and the cook top level with the equipment heat on to ensure satisfactory hood capture and containment.

Comfort. Under control.

Project Issue Information

Issue Name : Accurex hood control screwed through.

Description : Typically the hood control screen clips into the wall box. In this instance the incorrect box was installed in the wall.

Created By : National TAB **Assigned To :** National TAB - Will Turnbough

Status : Open

Originated Date : 08/18/2022 - Michael McDonnell - National TAB

Project Issue Information

Issue Name : Exhaust hoods/fans not powered

Description : PRV-2 and PRV-3 are not powered.

Created By : National TAB **Assigned To :** National TAB - Will Turnbough

Status : ALL

Originated Date : 08/18/2022 - Michael McDonnell - National TAB

Project Issue Response Details

- **08/19/2022 National TAB - Michael McDonnell**
  - Hoods and EFs have power.

Comfort. Under control.

08-15 CULVERS - WHEATON, IL

Project Issue Information

Issue Name : PRV-1 (RR) is not powered

Description : RR exhaust not running. EC notified.

Created By : National TAB **Assigned To :** National TAB - Will Turnbough

Status : Closed

Originated Date : 08/18/2022 - Michael McDonnell - National TAB

Project Issue Response Details

- **08/19/2022 National TAB - Michael McDonnell**
  - RR exhaust now has power and is running.

Comfort. Under control.

08-15 CULVERS - WHEATON, IL

Project Issue Information

Issue Name : PRV-1 RR rotation is incorrect.

Description : Rotation incorrect on single phase motor.

Created By : National TAB **Assigned To :** National TAB - Will Turnbough

Status : Open

Originated Date : 08/19/2022 - Michael McDonnell - National TAB

Project Issue Response Details

- **08/19/2022 National TAB - Michael McDonnell**
  - Video of rotation.
    1. Open IMG7532.MOV

- **08/19/2022 National TAB - Michael McDonnell**
  - Fan not balanced. Accurex will need to send replacement motor. Per manual: motor is factory pre-wired and cannot be changed in the field.

08-15 CULVERS - WHEATON, IL

Project Issue Information

Issue Name : PRV-2 and PRV-3 conduit drilled through fan housing.

Description : Conduit was routed/drilled through fan housing. Typically is routed through motor housing exhaust vent.

Created By : National TAB **Assigned To :** National TAB - Will Turnbough

Status : Open

Originated Date : 08/18/2022 - Michael McDonnell - National TAB

08-15 CULVERS - WHEATON, IL

Project Issue Information

Issue Name : PRV-2 and PRV-3 conduit too short.

Description : Conduit to fans is too short. Need enough slack to be able to tilt fans completely back for maintenance/grease duct cleaning. EC notified and will rectify today.

Created By : National TAB **Assigned To :** National TAB - Will Turnbough

Status : Closed

Originated Date : 08/18/2022 - Michael McDonnell - National TAB

Project Issue File Details

FuseIT84e43cf2263445769c2d6d8caa27c7f0.jpeg

Project Issue Response Details

- **08/19/2022 National TAB - Michael McDonnell**
  - EC was able to demonstrate fans can be completely tilted back.
- **08/18/2022 National TAB - Michael McDonnell**
  - EC was able to tilt fans completely back and says conduit is fine.

Comfort. Under control.

08-15 CULVERS - WHEATON, IL

Project Issue Information

Issue Name : RTU-1 (dining) missing return.

Description : Plans call for (5) 16” returns. (4) 18” returns are installed, and not in precise locations.

Created By : National TAB **Assigned To :** National TAB - Will Turnbough

Status : Open

Originated Date : 08/18/2022 - Michael McDonnell - National TAB

Project Issue File Details

FuseITba6c2d2a54d143d5b975e939f6d9f6cb.jpeg

FuseITf5863a50770d4b6d9ddb1da0f7246c08.jpeg

Project Issue Response Details

- **08/19/2022 National TAB - Michael McDonnell**
  - Due to limited ceiling space MC increased size of returns from 16” to 18” and deleted one return grille. Unit is achieving design airflow and return not causing issues.

CheckList Information

Name :	TECH - STEP 1: INITIAL WALKTHROUGH	**Status :**	NotSubmitted
Assigned Organization :	National TAB	**Asset :**	
Requesting Organization :	National TAB		

CheckList Item Details

INITIAL SITE WALKTHROUGH

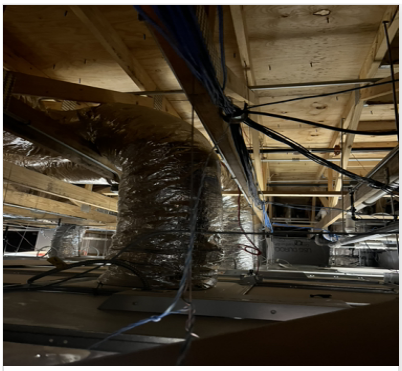
All diffusers and grilles are installed and match design?	Diffuser 2-14 not yet installed. 10" neck diffuser shipped to site. MC is installing a 12-10" reducer on the diffuser. RTU-1 only has 4 returns installed. Plans call for 5.

FuseITbab8411dfa26416...

Perforated diffusers are installed on the cook line? (4-ways will disrupt hood capture)	Yes

FuseITa78f7084356b4a6...

All hood filters installed and accounted for?	Yes
Hoods are wired and have power?	No. Hoods are wired but do not yet have power.
Thermostats have power?	Yes
Have trades/general contractor been notified about any issues and are they created on FaciliBuild?	Yes
On the cookline diffusers neck is there 18" (12" minimum) straight rigid duct run attached?	Yes



FuseIT1f358ff8d3fe400...

Notes/Comments :

CheckList Information

Name :	TECH - STEP 2: UNIT DATA AND EVAL	**Status :**	NotSubmitted
Assigned Organization :	National TAB	**Asset :**	
Requesting Organization :	National TAB		

CheckList Item Details

UNIT DATA AND EVALUATION WHILE GATHERING UNIT DATA CHECK THE FOLLOWING:

RTU's/AHU's

Economizers are assembled and functional?	Yes
Thermostat wire run from OCP on the RTU to the Ec terminal at the thermostat? If no, jumper can be installed from R to OCP temporarily. (The economizers will not open without OCP being energized.)	NA, Captive Aire DOAS units installed.
Motors are all operating below the FLA rating?	Yes
Are belts tight?	NA, direct drive units.
If direct drive unit is the speed controller working.	Yes
Is gas piping installed and valves turned on?	No, building does not yet have meter.

FuseITfe004271a116489...

Unit free of noticeable noise and vibration	Yes
EF's	
Rotation is correct?	PRV-1 (restrooms) rotation is incorrect. Factory issue, Accurex sending replacement.
Belts are tight?	Yes
Grease cup installed on hood fan?	Yes
Hinge kit installed installed on hood fan?	Yes
Lean grease rated fans back. Is grease duct installation adequate and is duct ran all the way to the base of the fan?	Yes
Flex conduit is long enough so that fan can be completely tilted back?	Yes. Appears too short, but it was demonstrated fans can be fully tilted back with no issue.
There is no major leakage around base of fan?	Yes
Is the motor operating below the motor FLA rating?	Yes
For restroom fan(s) is the back draft damper installed and can it fully open?	Yes
Unit free of noticeable noise and vibration?	Yes
The hood exhaust fans are installed in correct positions and are not switched?	Yes
HOODS	
Kitchen equipment installed in proper places?	Yes
Can kitchen equipment be turned on for final smoke test?	No, building does not yet have gas.
Second stage Grease Grabber filters are installed on the griddle hood?	Yes
DOCUMENTATION	
Have trades/general contractor been notified about any issues and are they created on FaciliBuild?	Yes

Notes/Comments :

Comfort. Under control.

Name :	TECH - STEP 4: FINAL TESTS	**Status :**	NotSubmitted
Assigned Organization :	National TAB	**Asset :**	
Requesting Organization :	National TAB		

CheckList Item Details

FINAL TESTS	
HOOD CAPTURE TEST	
List equipment turned on for testing	None
List smoke candle type used	45 second smoke emitter.
Smoke test capture - Perimeter of hood	100%
Smoke test capture - Top of cooking surface	100%
WITNESS	
Date test was completed	08/19/2022
TAB tech name / Firm	Michael McDonnell / National Tab
Site super name / Firm	Earl Pulda / McCon Construction
Owner representative name / Firm (if Applicable)	NA
Building pressure at front & back doors (All Systems On)	0.013"
ADDITIONAL	
Do actual net building airflow, design net building airflow, and pressure coincide? If not why? (All three should either be positive or negative)	Yes
Thermostats are programmed?	Yes
PRODIGY SETTINGS FOR RTU'S	
Parameter 65 set to 0	NA, Captive Aire DOAS units installed.

Parameter 78 set to 0	NA
Parameter 105 set to 6	NA
Parameter 156 set to 70 (Dining unit only)	NA
Parameter 156 set to 65 (Kitchen Unit Only)	NA
Parameter 170 set to 75 (Dining Unit Only)	NA
Parameter 170 set to 70 (Kitchen Unit Only)	NA
Parameter 131 set to the same % as OA minimum position?	NA
Parameter 117 set to the same % as OA minimum position?	NA
