Thank you for allowing National TAB the opportunity to bid this project. The following is our understanding of the scope of work and the associated cost.

Evaluation & Measuring airflow for all associated exhaust and supply fans located in the warehouse. From the walk thru the front section of warehouse has (4) sidewall fans that we believe are exhausting, 2 roof mounted fans exhausting from the general space, restroom exhaust, and 2 large paint booths (30" ductwork), and (2) 80/20 MUA units.

Rear section of warehouse has (4) sidewall fans that we believe are exhausting, 2 roof mounted fans exhausting from the general space, restroom exhaust, 1 small EF serving an oven (10" ductwork) and (2) 100% OA units. Collect unit info & fan performance criteria. Measure space pressure at various sequence of building operation. Submit report with findings & recommendations to assist in design of new systems and basic controls to allow for best space performance and ensure good building pressure. Once new systems are installed, National TAB will revisit and rebalance systems to new airflow based upon new design & SOO requirements to ensure good building pressure.

- Reporting & Project Management (*)

** PROJECT MANAGEMENT & REPORTING: Our reporting and project management system is a live, streaming system powered by FaciliBuild™ that coordinates our job schedule, interactively, with other networked trade participants and includes seamless file distribution, issue tracking and resolution, in project messaging, and a reporting system that has dynamic (not static) database. When we create a report, we create it with active equipment asset's that allows the owner to import our results and continue its' use for live maintenance recording. This allows you, at any time, to pull up the full history of your buildings complete asset list. This system of assets can belong to the owner for the life of the equipment and your facility.*
