Re: Carmax Tinley Park
Building Pressure issues

Dear Will Turnbough,

Aero Building Solutions is pleased to submit the following proposal for your review. We propose to furnish all necessary labor to perform the following scope of work:

Air Balancing:

Scope: Address excessive positive air pressure in building. Correct if possible.

Price - Five Thousand Six Hundred Thirty Five Dollars and No Cents

\$5,635.00

Total Price For TAB: **Five Thousand Six Hundred Thirty Five Dollars and No Cents**

\$5,635.00

Balancing will be performed using Standard TABB & NEBB procedures unless otherwise noted on proposal. Equipment must be started, temperature controls must be 100% complete, and there must be a minimum static pressure of 1.5" at time of test and balance. If deficiencies or limited access delay balancing, cost may be incurred. Pricing is based on branch and/or zone dampers (water valves) being installed in system as per specification. Price is representative of drawing interpretation and is valid for the above scope and equipment counts only.

For DDC Systems, Pricing reflects the calibration of a single point on a VAV & FPB. Control contractor is required onsite to assist with the set up of these units. Boxes shall be addressed, programmed, and commissioned prior to balancing.

If project requires Illinois Department of Public Health Ventilation Matrix to be supplied, substantial payment to be paid prior to submittal of signed certified matrix.

Exclusions: Permits, bonds, belt/sheave changes, refrigeration, steam, leakage, functional performance, lifts, motor/impeller troubleshooting/repair, control contractor assistance, temperature testing, vibration/sound analysis, pressure testing, phasing, schematic drawings, marking of dampers/valves, ASHRAE 110 Hood Verification, & Containment testing, and pre-readings unless otherwise specified.

All Work to be performed between the hours of 7am and 3:30pm during regular business days.

Please sign and return at your earliest convenience if you accept this proposal.

Thank you for your inquiry and should you have any questions, please contact us.

Sincerely,

AERO Building Solutions, Inc.
