Will – Please provide a description of the return visit work on each CO and return for Approval. A typical example of what we are looking for is shown below:

*Additional cost to return to site #4217 to complete the test and balance on EF-2, 4, and 6. Previous visit, EF-2 and 4 had existing back draft dampers that were shut in place, and EF-6 had not been replaced as part of the initial scope of work. IC has corrected these issues and now can now be balanced. Remaining punch list items will also be checked. Balance unit to WAG specs and retake temperature and humidity readings. Remaining punch list items will also be checked.*

Respectfully,  
Bill Spoolstra
