- Experience in complete Testing Life Cycle that starts from Analyzing Requirements, Preparing Test Cases, Executing Test Cases, Raising defects and Defect Tracking.
- Experience to handle multiple projects at same time.

Work Experience:

- Currently working with **MyU APP (Fikra Edutech Pvt Ltd.)**, Noida as Software Test Engineer from July. 2018 to till date..
- Worked with **Cyient Ltd Noida**, as Digital Cartographer from March 2014 to June 2018.

Technical Skills:

Testing type	: Functional Testing
Testing Platforms	: Web and Mobile
Bug Tracking Tool	: JIRA
Browsers	: Internet Explorer, Edge, Firefox, Chrome, Safari
Testing Tools	: Postman
Domain Knowledge	: Navigation, Healthcare, and Education
Other tool	: Google sheets

Projects Summary:

Project Name: MyU App.
Role: Test Engineer.
Duration: July 2018 to till now.

Description:

MyU is a mobile and web application that allows students and educators to connect via sending reminders, creating discussions, all in a social network-like experience that is safe, instant, and private. The app makes it easy to connect with anyone in the school community, makes classes more interactive, and sharing fun. We envision better-empowered education through technology.

MyU

Application has multiple functionality for Teachers, Students, and Parents. On the teacher side, they can initiate attendance and allow student marks to be presented automatically. They can also create assignments and students can respond to the assignments, then teachers are graded on them.

Responsibilities:

- Working closely with the Development team on a daily basis to ensure timely resolution of defects.
- Executing test suites, designing and developing test cases, debugging and reporting code bugs and pushing quality upstream.
- Performing Functional testing.
- Performed defect tracking & management in JIRA.

- Executed test cases and documented bugs found during the process of testing.
- Participated in Review and status Meetings.
- Reporting the Defects in JIRA defect tracking tool.
- Working as individual Contributor. Performed various type of testing assigned by Test Lead (Functionality, Usability, User Interface and compatibility) etc.,

Project Name: Cartopia

Client : CYIENT

Role : Sr. GIS Engineer

Duration : March 2014 to June 2018

Description:

Cartopia is a tool designed for editing maps. It works just like Google Map Maker but in Cartopia an editor can add information to its minute detail. The major challenge was to get to know the new domain. My responsibilities are understanding user tasks. I also looked upon visual aesthetic enhancement of Cartopia. Cartopia is a frontend online web application which is used for creating/updating TomTom Maps. It integrates different CPP applications like IRIS, User Management, CoreDB, Reference Map Layers, CPP-QA etc. The application provides options to read source information (base of editing) and create/maintain digital maps with high level of integrity between same/different types of geographical features, their levels. It uses QA tools for quality

MyU

assurance after each logical edits before updating the Map.Responsibilities. By using this tool users are creating, updating and deleting geometry as per client requirement provided in source. Source has information related to location with coordinates and information which should be updated. Many users are using this tool. They have sent enhancement and automation related cases in the tool by creating tickets. Developers are developing the feature as per requirements. Testers verify and validate the feature by using specifications rules.

Responsibilities:

- Perform activities to update databases using tool name cartopia.
- Prepare and review technical documents and reports Provide all technical advice regarding GIS issues.
- Develop documentation and material in support of the installation and support of GIS solutions Advance features.
- usage of web mapping APIs like Google Maps.

Education:

- Post Graduation Diploma in Computer Application.
- B.A(Bachelor of Art) from CSJMU.
- 12th from UP Board.
- 10th from UP Board.

Key Strength:

- Good analytical skills, Challenging and inquiring mind.
- Attention to detail and resolve, Understanding of common software failures and faults.
- Knowledge of the domain (highly desirable).
- Knowledge of the system or application-under-test (highly desirable).
- Experience in a variety of testing efforts (desirable).

Personal Details:

Father's Name : Shri Ram Raj Yadav
Nationality : Indian
Address : Prayagraj, Uttar Pradesh
Language Known : English, Hindi.
